Hackathon 3

Day 01: Laying the Foundation for your Marketplace Journey

Step 01: Choose your marketplace
I am choosing e-commerce marketplace for my business like shopify, Amazon and eBay so that I could sell my furniture in large quantity and could extend my business day by day..

Step 02: Define your business goals

My business goal is to provide good quality furniture with durability and choice so that I could gain customer trust because when I will provide good quality furniture with durability so then customers will come in my online shop again and this would be a very first step of my business..

Gaining customer trust would be my first priority..

Then I will provide as my services ready-made furniture with elegant design or customer can place

Date _____

order to make furniture according to their design..

And online delivery services will also be provided.. Delivery charges would be according to customer's area..

Online service is a good thing to gain customers because if I talk about businessmen so they don't have time to go market for buying so they prefer purchasing from online resources and my target audience would be businessmen so that if they buy something from my online store so I could deliver product and after that I will reach out to furniture suppliers and so on..

Step 03: Create a Data Schema

Document: 'Product'

Fields : 'Product-ID'

: 'Product Image'

: 'Product Name'

: 'Product Price'

Document : 'Order'

Fields : 'Order ID'

'Product ID'

'Product Name'

'Product Quantity'

'Product Price'

'Payment Method'

Document : 'Customer'

Fields : 'Customer ID'

'Product ID'

'Order ID'

'Name'

'Phone No.'

'Email'

Document : 'Delivery'

Fields : 'Delivery Charges'

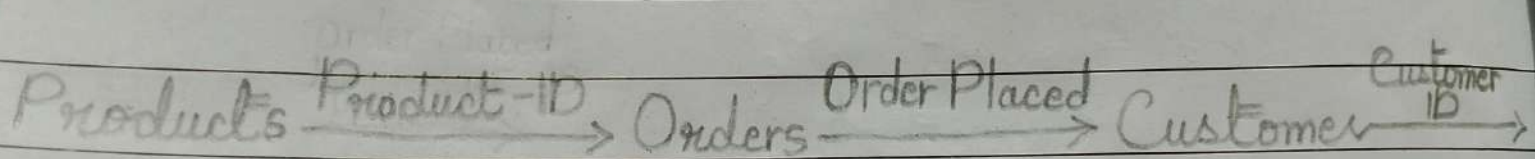

'Name'

'Email'

'Phone'

'Address'

Flow Chart

Delivery
